

Alumni Talk Series

The Global Webinar by AIT Graduates Club AIT Alumni Association, AIT Extension, AIT Solutions Prospects and Challenges in Digital Banking in the New Normal Era

Dec 16, 2021
Thursday

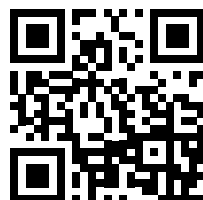

9:00 AM - 11:00 AM
Bangkok / Jakarta Time

About the Webinar:

The Fourth Industrial Revolution, 4IR, or Industry 4.0, conceptualizes rapid change to technology, industries, and societal patterns and processes in the 21st century due to increasing interconnectivity and smart automation. In particular, digital transformation is growing at an exponential rate which leads to the emergence of innovative business models and market ecosystems. The Covid 19 pandemic has accelerated the digital transformation of many industries, the financial services industry (FSI) included. It has forced industries to innovate and be creative in online activities, as there have been rigid

restrictions on the mobility of people and activities. Advanced technologies such as Blockchain, internet of things (IoT), artificial intelligence (AI), and robotics have become mature enough to create disruption in the banking and finance industry, both conventional and Islamic finance industries with the emergence of Digital Banking. The main objective of this webinar is to describe prospects and challenges of the digital transformation in the financial services industry, especially the potential for large impacts on both the conventional and Islamic finance industries. This potential impact exists in two ways: positive and negative.
